

Music Composition Guidance

All participants must also follow Official Rules for Participation.

MUSIC COMPOSITION is the process of creating a new piece of music. The **composer** (the student submitting the entry) is a person who expresses their original thoughts and ideas through the use of sound changes over time. The composer may submit an entry performed by an individual or group and/or make use of a sound library generated performance of a score composed in its entirety by the student. Composers are not required to perform their composition themselves.

All instruments, sounds, styles, and combinations are accepted. Software may be used to produce an audio recording that does not include commercially pre-programmed imported MIDI or other source files. Entries containing algorithmic composition techniques are not accepted. Whether an entry displays formal composition technique or a simple approach, it will be judged primarily on how well the student uses his or her artistic vision to portray the theme, originality, and creativity. Use of copyrighted material is prohibited.

- **Primary, Intermediate, and Special Artist divisions** do not require musical notation. The student may choose to submit iconic (“made-up”), traditional, or tablature notation, if desired.
- **Middle School and High School divisions** require notation, either traditional or tablature.
- Notation software may be used to create a score.
- Whether the score is handwritten or computer-generated, appropriate instrumentation and voicing are required for the performance.
- For electronic copies of notation, accepted file type is PDF.

Tips for Audio Quality

- Do not place the recording device on top of an instrument(s) or speakers.
- Turn off all noise-making devices in the room (air conditioners, fans, telephones, etc.).
- Record a short test and listen to it. If needed, change the recording volume or microphone location.
- Record two seconds of silence before and after performing your composition.
